

Aptor Power

Global supplier of industrial automation parts

Provide new and discontinued automated mechanical parts

**MEET ALL
YOUR SUPPLY
CHAIN NEEDS**

Company Environment

Apter Power reserves thousands of automation and control components produced by leading original equipment manufacturers (OEMs), allowing you to have a comprehensive view through a single channel. We are a harmonious, warm, and happy company.

The background features a blue-tinted image of industrial control equipment. On the left, there is a control panel with a screen and buttons. In the foreground, a green printed circuit board (PCB) is visible, populated with various electronic components, including integrated circuits and connectors.

Our Advantages Brands

ABB

Honeywell

Bently Nevada

General Electric

Other Brands

1

ABB

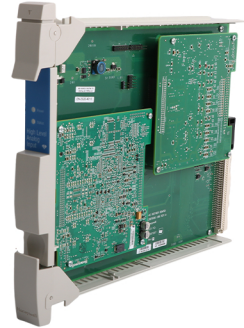

ABB's Distributed Control System (DCS) is a sophisticated automation solution designed to manage and optimize industrial processes across various sectors, including power generation, oil and gas, chemicals, and manufacturing

- **AC800M Series Controller I/O Module**
- **AC800F Series Controller Module**
- **AC31 Series Controller Module**
- **800xA Series Modules**
- **Bailey INFI 90 Module**
- **DSQC robot Module Spare Parts**
- **Advant OCS System Spare Parts**
- **H&B Freelance**

Honeywell's industrial automation products span control systems, sensors, actuators, and software that help companies improve productivity and safety. Process control systems, such as Honeywell Experion, enable real-time monitoring and optimisation of plant operations

- TDC 2000
- TDC3000
- TPS
- Experion PKS (C200 , C300)

Honeywell

3

Bently Nevada

Bently Nevada machinery protection systems are designed to monitor the health and performance of machinery, detect early signs of potential failures, and provide real-time protection to prevent catastrophic damage and costly downtime

- Bently 3500 Monitoring System
- Bently 3300 Monitoring System
- Bently 3300 XL 5/8mm Proximitors
- Bently 3300 XL 8 mm Proximity Probe

- GE Series 90-30 PLC (IC693)
- GE VersaMax (IC200)
- GE Series 90-70 PLC(IC697)
- GE PAC Systems RX7i(IC698)
- GE PAC Systems RX3i(IC695)
- GE Genius I/O PLC(IC660)
- GE Boards Mark VI (IS200,IS215)
- GE Boards Mark IV (DS3800)
- GE Boards Mark V (DS200)
- GE 531 Series

GE's industrial automation products include control systems, programmable logic controllers (PLCs), human-machine interfaces (HMIs) and data acquisition systems designed to improve productivity and real-time monitoring and control

EMERSON

- Ovation System DCS Card
- DeltaV System Dual Channel Redundancy Safety System

Emergency Shutdown Systems

- F7553 PLC Coupling Module
- F7126 Power Supply Module
- F6217 8-Channel Analog Input Module
- F3236 16-Channel Digital Input Module

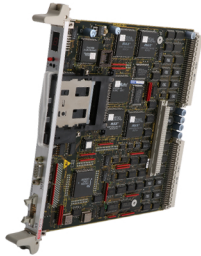

invensys .
TRICONEX[®]

- Tricon System Card

SIEMENS

- Siemens MOORE
- Siemens S5

Schneider
Electric

- Quantum 140 Series
- Modicon Premium

FOXBORO

- I/A Series System Module

24/7 Online Service

We provide the best pre-sales and after-sales service at all times

Professional Sales Team

We will promptly review your request and help complete your order

Full 12-month warranty

All products are supplied with a full twelve month warranty

A blue-tinted background image showing a close-up of industrial machinery, likely a conveyor belt or sorting system, with various components and rollers visible.

Selling To Countries

Apter Power gives you access to a global supply of automation parts at your fingertips, ensuring that manufacturers can avoid unnecessary downtime. Our products are sold to North America, South America, Central America, Central and South Asia, North-East Asia, South-East Asia, Australia, Northern Europe, Southern Europe, Eastern Europe, Western Europe, Middle East, North Africa, South Africa, etc
